Google Colab

PROFESSIONAL EXPERIENCE

Tech Tanks Solutions

Nov. 2021 - Sept. 2022

IT Engineer

Responsible for building technological products/services that meet customer needs, and also providing constant research for high-tech solutions to improve the company's product/services.

Accomplishments:

- I conducted a review of the current company website and implemented the new branding, design, user experience, and search engine optimization
- Analyzed the company sales data from 2018 to 2021 and identified the products and services that are generating more revenue and the ones that need improvements
- Trained clients on how to use the company's ERP system to ensure a smooth transition and streamline their business processes
- Conducted market research and identified technology that are relevant to the company target clients

Your Daily Store Online**May 2020 - Nov 2021****Data Analyst And IT Support**

Managing YDS company's IT operations and infrastructure, and also applying technological systems and products to simplify internal business processes. The goal is to maximize day-to-day efficiency and productivity within the company, for instance, by automating complex tasks or enabling faster communication across departments, and analysiing data for decision making

Accomplishments:

- Analyzed the company sales data and identified the best-selling items, and the high-value customers of the company
- Evaluated the benefits and drawbacks of different systems options and make recommendations based on the budget and goal

Nigeria Communications Commission**Feb. 2018 - Dec. 2018****Student Internship**

Opportunity for career exploration and development, and learning new skills and organisational working experience.

Accomplishments:

- Engaged in Network, Computer System, and Printers Installation and troubleshooting.
 - Ensured all website information are accurate and up to date
-
